## EDUCATION

### Delhi Technological University

AUGUST 2018 - 2022

## EXPERIENCE

### Coding Blocks — *Software Development Engineering Intern*

JANUARY 2020 - APRIL 2021

Working as a full stack developer

Frontend: [Working with Nuxt JS](#) (Vue JS Framework) and [Ember JS](#) on GUI, implementing a new product line and v2 of the website.

Working with Ember on the admin portal for managing the product and features of the website

Backend: Working with Node, Express, PostgreSQL on implementing new features

Worked on creating an OTP service integrated with MongoDB for logins and implementing it with the backend API

Created a portal with React, Redux, TypeORM, Express for campus ambassadors to manage tasks, engage with each other and the team. [here](#)

### WebCube — *Fullstack Developer, Founding Member*

MAY 2021 - PRESENT

Working with a small team of developers to create web applications for companies. (delivered 3 projects).

## PROJECTS

### Youtube Clone

Developed a clone of youtube implementing jwt authentication allowing users to upload, view videos and subscribe to channels, interact with comments and likes. Used MongoDB, Typescript, React.

### Twitter Canvas — *live at [twittercanvas.herokuapp.com](https://twittercanvas.herokuapp.com)*

A web app allowing users to find who their favorite personalities are following and who they are following and soon.. finding out how they are linked in a graphical format. Integrated with Twitter API to fetch data.
